January 18, 2006

To Whom It May Concern:

I am writing this as a letter of reference for Venture Mechanical Systems Ltd. (VMS). I have worked with VMS for several years and have always been pleased with the service I receive from them.

In 2004, VMS was awarded the contracts for the mechanical assembly of two HeatWave 22.20 model kiln systems as well as the rollcase material handling system for these units. VMS completed these contracts within the tight delivery timeframe allotted and within the budget for these contracts. I was very pleased with the quality of the work and the professionalism of the VMS employees and staff. I felt that at all times the success of the project was at the forefront of their minds. They kept me apprised of their progress and were quick to consult me if there was ever any questions about quality or scope of work.

It was a pleasure working with VMS on this project and I would not hesitate to use them again for either general mechanical work or steel fabrication.

Sincerely

**HeatWave Technologies Inc.,**

Scott Spencer, P.Eng.

Mechanical Systems and Installation Manager
